SUTHARSAN M

Vellore, Tamil Nadu, India

96298 61752 — msutharsanmathivanan@gmail.com — LinkedIn — GitHub

Technical Skills

Programming Languages: C, C++, Java, Python
Front-End Development: HTML, CSS, JavaScript,React.js
Back-End Development: Node.js
Database: MySQL
Interpersonal Skills: Effective Communication, Collaborative Teamwork, Effective Decision making and problem solving, Skilled in critical thinking

Education

SRM Institute of Science and Technology **2025 – Present**
Master Of Computer Applications; CGPA: 9.60 *Chengalpet, India*

Vellore Institute of Technology **2022 – 2025**
Bachelor Of Computer Applications; CGPA: 8.08 *Vellore, India*

Sunbeam School of Excellence CBSE **2020 – 2022**
Higher Secondary *Vellore, India*

Experience

Internship — Full Stack Developer **Nov 2025 – Dec 2025**
Future Interns(Rebranding a Website)

- Developed responsive **full-stack web applications** including a **professional portfolio website and mini e-commerce storefront using HTML, CSS, JavaScript, React.js, and Node.js**.
- Implemented interactive features **such as product filtering, shopping cart management, contact forms, form validation**, and **database integration using MongoDB/MySQL**.
- Redesigned and optimized **modern website interfaces** using **AI-assisted design tools, focusing on improved UI/UX** and **mobile responsiveness**.

Projects

Food Delivery Web Application — HTML, CSS, JavaScript **Nov 2024**
Fully responsive web app for browsing, ordering, and tracking meals. *GitHub — Live Demo*

- Accomplished a fully responsive **Food Delivery Web App** by developing interactive restaurant browsing, menu viewing, cart management, and real-time order tracking, resulting in improved user engagement and faster ordering process.
- Optimized front-end performance with **HTML, CSS, and JavaScript**, achieving **35% improved UI responsiveness**.
- Deployed the application on **Vercel**, ensuring **99% uptime** and reliable performance across devices.
- Enhanced customer experience through intuitive UI design, mobile-friendly layouts, and interactive features.

Smart Home Automation — Arduino, Blynk, C++ **April 2024**
IoT-based automation system enabling real-time control of home appliances. *GitHub*

- Engineered a **Smart Home Automation System** using **Arduino Uno**, **HC-05 Bluetooth**, and **Blynk Cloud** for appliance control.
- Designed automation logic that **reduced manual energy usage by 40%** and enabled secure remote access via mobile app.
- Integrated **IoT and cloud communication** ensuring stable device monitoring and operational reliability.

Autonomous UAV — C++, Pixhawk, Raspberry Pi **April 2025**
Autonomous UAV system using Raspberry Pi and Pixhawk for intelligent navigation and obstacle detection. *GitHub*

- Developed an autonomous UAV **Unmanned Aerial Vehicle** system capable of obstacle detection, path planning, and real-time navigation using AI and sensor-based technologies.
- Integrated hardware components such as **Raspberry Pi, Pixhawk, GPS module** to enable autonomous navigation.
- Implemented flight control algorithms and **navigation modules using C++ programming** for real-time UAV movement control and automated mission execution.

Certifications

Oracle OCI AI Foundations Associate (2025) Certificate

Achievements

Smart Home Automation (Recognition) – IIC, Dept. of Smart Computing, VIT **Apr 2024**
Project Showcase: IoT-based automation system for lights and fans using Arduino *Certificate of Recognition*
